## proVap

**PIN # 1107**

### Item Description

proVap 06

proVap 10

### product Number

MV-020200

MV-020201

### polyethylene vapour barriers

package 20' x 100' / roll

Standard roll weight: 92 lbs. (41.7 kg)

### Product Information

ProVap is a polyethylene sheet vapor retarder sheet manufactured to CAN/CGSB 51 .34.M86.

#### proVap 10

Material: low density polyethylene.

Thickness: 10 mil (.25 mm)

Color: Transparent Clear

Standard roll width: 20 ft. (6.09m) folded to a net width of 5ft. (1.5m)

Standard roll length: 100 ft. (30.4 m)

Standard roll weight: 92 lbs. (41.7 kg)

Water Vapor permeance: 0.029 perms (1.6 ng/Pasm<sup>2</sup>)

#### proVap 06

Material: low density polyethylene.

Thickness: 6 mil (.20 mm)

Color: Transparent Clear

Standard roll width: 20 ft. (6.09m) folded to a net width of 5ft. (1.5m)

Standard roll length: 100 ft. (30.4 m)

Standard roll weight: 74 lbs. (33.5 kg)

Water Vapor permeance: 0.029 perms (1.6 ng/Pasm<sup>2</sup>)

#### Method of Application:

- ProVap vapor retarder is loose laid over suitable substrates.
- Overlap all edges 6" (150 mm).
- ProVap should be sealed with ProTape on the vertical surface at roof perimeters, walls, curbs etc. and all penetrations and protrusions to provide continuity of building air/vapor envelope

#### Storage:

- Store product in a dry area till used

#### Shelf Life:

- There is no product limitation

#### Coverage Rates:

- 2000 ft<sup>2</sup> per roll
