### Product Information

Our colour matched #9 woodGrip™ fasteners are the perfect partner to our Termination bars and L-trim bars. The high Hex washer head provides driving stability and a sharp point for quick installation. Assembled with a controlSeal washer for a consistent, weather tight seal and improved appearance. These fasteners are treated with a corrosion resistant coating system.

### Method of Application:

9–15 woodGrip HWH Sharp Point Assembled controlSeal Metal to wood Drilling capacity: 24 ga (.024) Self-drills through the metal panel and taps into wood substrate. Min penetration in wood substrates should be no less than 1"
